Game Designer | Systems & Combat Design, Unity (C#), Tools Development

Summary

Game designer at KnockUp Game Studio with a programming background. Lead designer on a 4-player local co-op roguelite, owning the GDD, class and room design, and balance spreadsheets. Also builds Unity tools for sale and ships solo games and mods.

Experience

Game Designer Apr 2026 – Present
KNOCKUP GAME STUDIO

- Lead designer on Rogue Dungeons, a 4-player local co-op roguelite, working in a team of 10.
- Wrote the GDD covering 4 classes (Tank, Damage, Support, Assassin), a special-room system with 7+ room types and per-area spawn rules, and enemy lists for animation planning.
- Built a weapon balancing spreadsheet in which per-weapon attributes feed a single balance multiplier, currently covering 8 weapons.

Unity Developer 2023 – Present
SNOG (INDEPENDENT)

- Built an XNode-based Dialogue System (Lite and Pro) with condition-group branching, variable substitution, a graph validator and a demo scene.
- Developed several Unity prototypes and MVPs, from 2D platformers to 3D with different mechanics.
- Also built Audio Manager, Interaction System and Timer Manager as reusable, inspector-configurable packages for distribution and sale.

Education

Software Engineering (incomplete) May 2022 – Jul 2025
UNIVERSIDADE ESTADUAL DE PONTA GROSSA *Ponta Grossa, Brazil*

High School Diploma Dec 2021
COLÉGIO ELITE PONTA GROSSA *Ponta Grossa, Brazil*

Courses & Certifications

- Epic Games Game Design Professional — Coursera (Nov 2025)
- Low Poly 3D Modelling and Low Poly Character 3D Modelling — Domestika (Nov 2025)

Projects

The Heart of the Garden *Unity, C#, itch.io* 2025 – 2026

- Designed and developed a first-person narrative puzzle game in 5 chapters, shipped on itch.io after 4 months of production.
- Used non-Euclidean spaces and objects that vanish when looked away from to express fragile memory and attention.

Shadows of Doubt Expanded (mod) *C#, BepInEx, Harmony* 2026

- Created 3 custom killer archetypes (Neighbor, Fanatic, Broker), each with its own victim-selection logic and physical leads and evidence for the player to find.
- Built a reusable framework (archetype definitions, registry, fluent builders for documents and leads) so new killers can be added as data-only content.

Operations Apps, Cargill *Power Apps*

- Built, published and maintained internal Power Apps for operations, including a shift-schedule app and a shift-handover tracker, with developer documentation.

Skills

Design: GDD Writing | Systems & Balance Design | Room & Combat Design | Narrative & Dialogue Design
Engines & Tools: Unity | Unreal | Git / GitHub | Power Apps | BepInEx / Harmony
Programming: C# | C++ | Java
Languages: Portuguese (native) | English (fluent) | Spanish (intermediate)
